

We don't talk about Bruno

Florian Garcia

Tech lead at [Synapse Medicine](#)

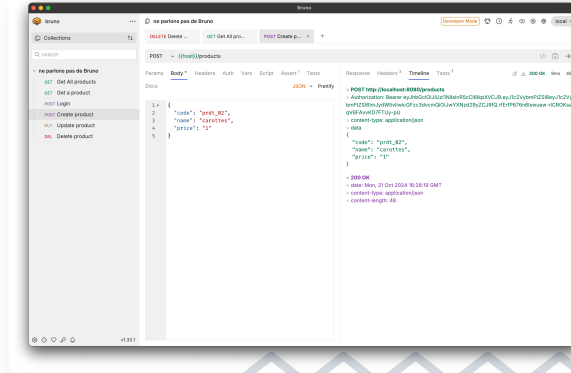

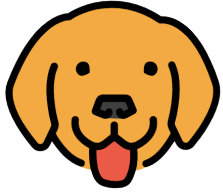

- Bordeaux 🍷, France 🥖
- Focusing on improving healthcare with technology 🏥
- I often write stuff in my personal [blog](#)
- Say hi at 🦋 [@imflog.bsky.social](#)

[We are looking for new talents](#) ! 🚀

Who What is Bruno ?

- An open source API Client 🍷
- Like Postman 🔪 , Insomnia 🌀 ...
- Fast ⚡ and Git friendly 📦
- Offline only, no cloud sync !
- Written in Javascript 🟡
- UI, CLI and VS Code extension 📄

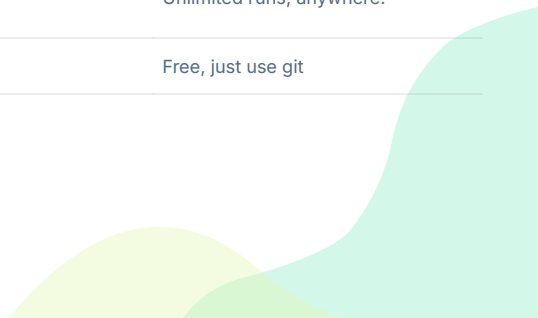

Demo

VS Postman

	Postman	Bruno
Request protocols	HTTP, GraphQL, gRPC, WebSocket, Socket.IO, MQTT, SOAP.	HTTP and GraphQL.
Collection format	Open source JSON format.	Plain text markup language called Bru.
Collection storage	Proprietary cloud	In your file system.
Collection run	Free and basic plan at 25 runs per month. Professional at 250 runs, unlimited for Enterprise.	Unlimited runs, anywhere.
Collaboration	Paid feature to share with more than 3 users.	Free, just use git

VS Postman

	Postman	Bruno
API requests transfert	Through Postman servers in the web app. <u>Some reports</u> of proxied requests from the desktop app.	Directly from your computer.
Offline ?	<u>No</u>	Yes.
Scripting with NPM modules	Using workarounds like pulling from a CDN or copying the library code in a variable.	Use a package.json, like usual
CLI	Postman CLI or Newman. Both have limits on Postman server API calls amount based on purchased plan.	<u>Bruno CLI</u> . Free.
Local performance testing ?	Yes with run and user limits.	Not yet. Planned in the golden edition.
Additional features	<u>Many</u>	<u>Not so many.</u>
